- 12" screen fixation on inner rear wall
- Various pre-punched cable entries on every direction
- Ventilation slots for passive cooling of the devices
- Load capacity of up to 50 kg

Product Overview

The DIGITUS wall mounting cabinet protects your video control system of unauthorized access.

It can be used for any networking, security, DVR, sound, paging or patching applications.

With the mounting brackets you can easily fix your device, no matter if it is capable for 482.6 mm (19") mounting or not. Soft rubber bumpers on the adjustable fixation bracket will keep your device on its exact position without damage during opening and closing the door. You can also install a screen inside of the cabinet with the 12" fixation bracket on the rear wall. To connect all your installed components with power there is a 482.6 mm (19") 2U bracket added on the inner top side to fix a PDU (power distribution unit). Various cable entries on every direction will ensure an easy cable management.
