

Delock DisplayPort EDID Emulator 8K

Description

This EDID Emulator by Delock **emulates a monitor** so that the signal source does not switch off the signal or change the resolution, even without a connected monitor. The adapter contains a standard set of **EDID/DDC data**, but it can also read and save the data of a connected monitor.

Extra features

The number of **DP lanes for data transmission** (1, 2 or 4) can be selected depending on the desired resolution. The HPD (**Hot Plug Detect**) button can be used to switch the connection to the connected monitor on and off in the same way as hot plugging.

Item no. 64328

EAN: 4043619643288

Country of origin: China

Package: Retail Box

Technical details

- Connectors:
Input: 1 x DisplayPort male
Output: 1 x DisplayPort female
- Resolution up to 7680 x 4320 @ 30 Hz (depending on the system and the connected hardware)
- Supports HDR
- Supports HDCP
- No external power supply needed
- LED indicator
- Push-button
- Metal housing
- Colour: anthracite
- Dimensions incl. connector (LxWxH): ca. 62.8 x 23.3 x 10.8 mm

Package content

- EDID emulator
- User manual
