

GAMING DAC PRO S

The Gaming DAC Pro S turns ordinary headsets and headphones into high-performance sound systems. A certified high-resolution sampling frequency with a correspondingly high bit depth ensures crystal-clear voice transmission and an immersive sound with breathtakingly differentiated details. Its high signal-to-noise ratio of 103 decibels is outstanding in its class. In addition, the Gaming DAC Pro S is not only super compact, but it can also be conveniently connected, via USB and TRRS plugs, to all standard PC systems, consoles, headphones and headsets.

Features

- CERTIFIED FOR A HIGH-RESOLUTION EXPERIENCE**
 The Gaming DAC Pro S is certified according to the requirements of the Japan Audio Society (JAS) for modern and high-resolution audio attributes.
- IMMERSIVE GAMING**
 The high-resolution sampling frequency of 96 kHz at 24 bits and a strong output power of 2 volts allows acoustic details to be experienced to the full.
- UNDISTURBED, CLEAR SOUND**
 The Gaming DAC Pro S provides an alternative to native sound cards. Noise from the power supply is avoided and a crystal-clear sound is ensured by an excellent signal-to-noise ratio of 103 decibels
- DAC & PLAY**
 For maximum compatibility, the Gaming DAC Pro S can be conveniently connected to player devices via USB, and it is connected to headphones and headsets via its gold-plated port for TRRS / stereo plugs.
- PRACTICAL AND PORTABLE**
 The Gaming DAC Pro S has the compact format of a common USB flash drive and be carried around just as easily.
