

For Rebel C Series PC Cases

REBEL C SERIES VGCK 4.0

With the Sharkoon Rebel C Series Vertical Graphics Card Kit 4.0, graphics cards can be installed vertically inside all cases of the Rebel C Series. Installation is easy and provides the card with a presentation that is even more eye-catching than before. The graphics card kit's PCIe 4.0 specification offers maximum performance with extra-fast data transfer.

Features

MODERN STANDARD

The Rebel C Series Vertical Graphics Card Kit 4.0 consists of a bracket for the graphics card as well as a modern PCIe 4.0 riser cable for the connection to the mainboard. The PCIe 4.0 standard ensures a maximum data transfer rate of a fast 252 Gbit per second.

EASILY INSTALLED

The installation of the graphics card with the Rebel C Series VGCK 4.0 can be done in a few simple steps: First, the riser cable is attached to the bracket and then the graphics card is slotted into place. After the riser cable has been connected to the mainboard, the whole construction can finally be screwed into the Rebel C Series case.
