

QSFP 40G Adapter

Description

The BlueOptics® BO-QSFP-SFP+ QSFP adapter is a high performance, cost effective module supporting a data rate up to 40Gbps.

BlueOptics® adapters are 100% compliant with QSFP Multi-Source Agreement (MSA).

The QSA Module interoperates with all major optical modules and direct attached copper cable vendors. Its design assures minimum loss on the conversion path between the QSFP cage and the SFP+ receptacle. The high-speed data channel of the SFP+ receptacle is connected to lane 1 of the QSFP connector.

This adapter supports all SFP+ optics and cable reaches. Compatible switch models are:

Features

- ✓ 40Gb/s serial optical interface
- ✓ Up to 11.1Gbps Data rate per channel
- ✓ Hot-pluggable QSFP footprint compliant to SFF-8431
- ✓ 2-wire interface for management
- ✓ Metal enclosure, for lower EMI
- ✓ Low crosstalk
- ✓ Secure latching mechanism
- ✓ RoHS compliant and lead-free
- ✓ Single +3.3V power supply
- ✓ Compliant with SFF-8432
- ✓ Compliant with SFF-8436
- ✓ Case operating temperature
 - Industrial: -20°C to +85°C

Applications

- ✓ 40G Ethernet
- ✓ Fibre Channel
- ✓ Infiniband QDR
- ✓ Data Center

Warnings

Handling Precautions: This device is susceptible to damage as a result of electrostatic discharge (ESD). A static free environment is highly recommended.

Laser Safety: Even small radiation emitted by laser devices can be dangerous to human eyes and lead to permanent eye injuries. Be sure to avoid eye contact with direct or indirect radiation.

Warranty

Every BlueOptics® adapter comes with a 5 year replacement warranty and lifetime support.

For a warranty inquiry, please contact your CBO sales representative.

This warranty only covers the first user of the equipment.

Important Notice

Performance figures, data and any illustrative material provided in this data sheet are typical and must be specifically confirmed in writing by CBO before they become applicable to any particular order or contract. In accordance with the CBO policy of continuous improvement specifications may change without notice.

The publication of information in this data sheet does not imply freedom from patent or other protective rights of CBO or others.

Further details are available from any CBO sales representative.

Installation

Before installation attach an ESD-preventive wrist to ensure not to damage the adapter or hardware.

BlueOptics® BO-QSFP-SFP+ can be installed in any Small Form Factor Pluggable+ (QSFP) port. You can install the BO-QSFP-SFP+ regardless if the system is powered on or off, because it is hot-swappable.

Insert the adapter into the SFP port and add your module.

You can now connect your cable.

Notes:

1. GND is the symbol for signal and supply (power) common for QSFP modules. All are common within the QSFP module and all module voltages are referenced to this potential unless otherwise noted. Connect these directly to the host board signal common ground plane.
2. VccRx, Vcc1 and VccTx are the receiving and transmission power suppliers and shall be applied concurrently. Recommended host board power supply filtering is shown below. Vcc Rx, Vcc1 and Vcc Tx may be internally connected within the QSFP adapter module in any combination. The connector pins are each rated for a maximum current of 500mA.

7. EEPROM Information

The SFP MSA defines a 256-byte memory map in EEPROM describing the adapters capabilities, standard interfaces, manufacturer, and other information, which is accessible over a 2 wire serial interface at the 8-bit address 1010000X (A0h).

224-255	32	Vendor Specific	Vendor Specific EEPROM

8. Digital Diagnostics / Digital Optical Monitoring

The adapter provides serial ID memory contents and diagnostic information about the present operating conditions by the 2-wire serial interface (SCL, SDA).

The diagnostic information with internal calibration or external calibration are all implemented, including received power monitoring, transmitted power monitoring, bias current monitoring, supply voltage monitoring and temperature monitoring.
