

## X-908 Infini2 white – next level Infinity-Mirror

The RGB illuminated infinity mirror in the front of the case with several effects, RGB LED-strip on the PSU tunnel and three serial 120mm RGB fans make the X-908 Infini white a real eye catcher. The front made of tempered glass and the side part made of 4mm thick tempered glass give a generous insight on strong effects and colors, which can be managed by a switch on the front or via the 5V RGB header connection (addressable RGB LEDs). Plenty of space for additional fans, water cooling and hard drives can be found in the spacious interior of the X-908 Infini2 white.

In the top of the case you can find a removable dust filter and the controls. In addition to two USB 3.0 type A, two USB 3.0 type C ports and HD audio jacks, there are two separate switches for controlling the fan speed. A dust filter in the power supply tunnel and silent blocks, on which the power supply is stored, allow a quiet and clean operation. The X-908 Infini2 white leaves nothing to be desired with a removable hard disk mounting frame, a holder for long graphics cards, the included RGB sync cable and a wide range of cable laying options.

- ✓ Front panel made of tempered glass with RGB Infinity-Mirror
- ✓ Window side panel made of 4mm thick tempered glass
- ✓ Three 120mm RGB fans and RGB LED-strip
- ✓ 3pin RGB header connector for 5V RGB motherboard control
- ✓ white interior paint

## Specifications
