

SILVERSTONE

TP05

Slim-profile aluminum alloy M.2 SSD cooling kit

- Slim-profile design
- Compatible with PS5 SSD specifications
- Aluminum alloy heatsink increases M.2 SSD cooling area
- Efficient heat conduction pad for reducing temperature
- Double layer design enhances SSD cooling for stability and efficiency
- Supports 2280 length M.2 SSD

Specifications

Model No.	SST-TP05B
Material	Aluminum
Color	Black
Thermal pad conductivity	0.5mm = 1.8W/m.k, 1.75mm = 1.5W/m.k
Thermal pad thickness	0.5mm x 2 1.75mm x 1
M.2 size support	2280 (22mm x 80mm)
Net weight and dimension	Gross weight: 76.4mm (W) x 24.8mm (H) x 10.3mm (D), 23.5g Thermal pad 1: 70mm (W) x 0.5mm (H) x 20mm (D), 1.5g Thermal pad 2 : 70mm (W) X 1.75mm (H) X 20mm (D), 5.25g

* If the M.2 slot on the motherboard is situated next to a PCIe slot, the height of the TP05 's heatsink may interfere with graphic card or expansion card installation, we recommended installing TP05 onto other available M.2 slots on the motherboard to avoid interference issue.

** The PS5 currently has two versions: PS5 and PS5 Slim. TP05 is suitable for both versions.

Compatible with PS5 M.2 SSD specifications

SILVERSTONE

Double layer design enhances SSD cooling for stability and efficiency

5.6mm

Slim-profile aluminum alloy heatsink increase M.2 SSD cooling area

Supports 2280 length M.2 SSD
