

MASTERFRAME 600 Mesh

The MasterFrame 600 Mesh is a premium open-frame mid-tower chassis built for high-performance hardware, extreme cooling, and total customization.

Designed with Freeform 2.0 in mind, it supports ITX to E-ATX motherboards and offers full access to modular design files, empowering users to build and evolve without limits.

FEATURES

FreeForm 2.0 Exo-structure

The exposed frame structure enhances chassis adaptability and provides flexible configuration options for various scenarios.

Flexible Motherboard Support

Supports Mini-ITX to E-ATX motherboards, offering compatibility with a wide range of builds and configurations.

Versatile & Maker-Driven

Its open-source design and interchangeable panels offer endless personalization possibilities, transforming your chassis into a unique expression of style.

Extensive Cooling Support

Can house up to eleven fans and multiple radiator sizes (up to 420mm), ensuring superior thermal performance.

Ample GPU Clearance

Accommodates graphics cards up to 485mm, offering plenty of space for high-end GPUs.

Included GPU support bracket

The included GPU support bracket prevents GPU sag and ensures stability during intense gaming or high-performance workloads, maintaining a clean and secure build.
