UNO3 - Durability and elegance

Elegant, subtle, yet practical and durable - such is the USB UNO3. It's a great solution for those who value convenience, versatility and remarkable appearance of the memory carrier. An additional advantage, especially for absentminded users, is the lack of a plug.

Safety of your data

The metal casing guarantees the durability of the carrier against mechanical damage. Additional data protection is guaranteed by COP (Chip on Board) technology. It provides resistance to shocks and splashes. Such protection means that the USB UNO can be widely used even in harsh outdoor conditions.

High efficiency

The USB UNO 3.2 gen.1 is available in five capacities: 16 GB, 32 GB, 64 GB, 128 GB and 256 GB. The components used allow read and write speeds of 60 MB/s and 20 MB/s respectively. Optimum speed and capacity make the UNO3 an ideal USB for storing documents, photos and recordings.

Lifetime warranty

Our company at every stage of the production process is fully committed to the highest quality of the offered memory sticks, which is why all USB flash drives are covered by a lifetime warranty.
