COLORS

The NTH-Cable is a high-quality flexible cable for use with the RØDE NTH-100 headphones – available in 1.2m and 2.4m cable lengths. It features a locking connector that attaches to the earcup for complete security, and the cable terminates in a pair of reinforced 3.5mm TRS jack plugs with integrated strain relief moulding for reliable, long-term use. A threaded ¼-inch adaptor is also included for use with professional audio equipment. The connector on each end features a removable ring that can be replaced with any of the included coloured rings for easy cable identification. Available in black and also in the four channel colours used in the RØDECaster Pro and RØDE Connect. A rubber seal is also included for the earcup headphone jack that is not in use.
