

BB10

Battery Hydrometer Tester with Clear Colour Coded Readout

PRODUCT DETAILS

- Hydrometer battery tester
- This tool is used to test the battery charge state
- Easy test result reading thanks to the clear colour coded scale
- It determines the charge state by measuring the specific gravity (density) of the electrolyte
- The greater the concentration of sulphuric acid, the more dense the electrolyte becomes. The higher the density, the higher charge
- Tube material glass
- Clean with water after each use and dry before next use
- Packed in a white cardboard box
