Privacy You Can Trust

With mobile devices being used more in public, privacy protection has become an increasingly important issue. "Shoulder surfing" as it has become labeled, is a growing form of identity theft in which private on-screen information is either viewed or photographed over the shoulders of anyone using a mobile device.

Prevent Prying Eyes

Whether you use a smartphone, Itablet or monitor, you can protect your privacy in public or in the office with Fellowes® PrivaScreen™ Filters.

Clear Front View, Total Blackout Side View

PrivaScreen™ Filters blackout the screen image when viewed from side angles to prevent prying eyes from reading your screen. Yet on-screen data is clearly visible from a straight-on view, allowing you to work worry-free, even on the go.
