

InLine® Contact Cleaner, universal cleaner for contacts and devices

* Preise inkl. gesetzlicher MwSt. zzgl. Versandkosten

Marke: INL

Bestell-Nr.: 43205

InLine® Contact Cleaner is based on especially high-quality, specially formulated, highly effective solvents. The ingredients evaporate quickly and completely residue-free. Due to the special formulation of the active ingredient, InLine® Contact Cleaner can be used very universally.

Applications: Gentle but effective cleaning of electromechanical contacts, relays, components and equipment. Particularly suitable for use on precision instruments and sensitive electronic components. Good replacement or supplement for ultrasonic cleaning and steam degreasing.

User instructions: Spray the surfaces to be cleaned specifically and ensure uniform wetting. Use spray tubes in hard-to-reach places.
