Macaw

schleich WILD LIFE Macaw:

The scarlet macaw is a large, brightly coloured parrot from South America which feeds on fruit and nuts.

The Scarlet Macaw is known for its magnificent plumage that glows in bright colours. It is not only beautiful but it is also very noticeable. In its home, the rain forest, however, he just blends in with the green leaves and colourful fruits. Its favourite foods include not only fruits but also Brazil nuts, of which it breaks the hard shell easily with its beak. You can often see Scarlet Macaws how they lick clay on riverbanks. The clay renders toxins in unripe fruit harmless and for the macaw it works as a home remedy for stomach aches.
