- 11.2mm wide, 1.5m long
- Shrinks when heated to allow easy cable identification
- Recommended for use with cables between 3.6mm and 7.0mm
- Ensures durable, easily readable results

This non-adhesive tape is made of a special material that is wound in the tape cassette as a flat tube. Once printed with the relevant identification details, the tube is opened up and passed over a cable or terminating connector. Once heated using a heat gun, the tube shrinks to about half its original width, and in doing so grips the cable.
