Passive aluminum heatsink for all M.2 SSDs, size 2280, high 3 mm.

Axagon CLR-M2L3 Passive aluminum heatsink for all M.2 SSDs, size 2280, high 3 mm:

AXAGON CLR-M2L3 ALU passive heatsink for ideal cooling of high performance M.2 SSDs, especially NVMe.

The universal passive heatsink can be used for M.2 cards, size 22 x 80 mm. Two supplied thermally conductive pads allow cooler installation for all one-sided as well as double-sided M.2 SSD disks.

3mm high ribbed aluminum heatsink assists in a better dissipation of heat generated during the M.2 SSD operation. It also reduces the drive temperature by up to 15°C. This prolongs the M.2 SSD life and prevents disk slow down, so-called "Thermal Throttling".

Thanks to its easy installation and compact dimensions, the heatsink can be used not only with M.2 AXAGON adapters, but also with M.2 (NGFF) slots on motherboards, etc. Low profile of heatsink allows usage in limited space.
